

# **BOONTON ATHLETIC DEPARTMENT**

## **TEAM RESPECT PLEDGE – 2021-2022**

### **SPORTS & ACTIVITIES**

We, the Student-Athletes at Boonton High School, pledge to commit to respect, safety and inclusion for all members of our team and school community. We pledge to take leadership by setting an example of respect interactions for all.

**We pledge to:**

- Avoid using language, name-calling or slurs that put others down because of such differences as race, sexual orientation, gender identity/expression or religion.
- Refrain from hazing and all other initiation activities.
- Refrain from any inappropriate forceful and/or aggressive physical contact.
- Believe that Team Respect is a winning strategy: when each team members feel safe and respected, they can play their best for the team.
- Take a leadership role by setting an example of respect for teammates as well as opposing teams and fans.

## NJSIAA PARENT/GUARDIAN CONCUSSION POLICY ACKNOWLEDGMENT FORM

In order to help protect the student athletes of New Jersey, the NJSIAA has mandated that all athletes, parents/guardians and coaches follow the NJSIAA Concussion Policy.

A concussion is a brain injury and all brain injuries are serious. They may be caused by a bump, blow, or jolt to the head, or by a blow to another part of the body with the force transmitted to the head. They can range from mild to severe and can disrupt the way the brain normally works. Even though most concussions are mild, **all concussions are potentially serious and may result in complications including prolonged brain damage and death if not recognized and managed properly.** In other words, even a "ding" or a bump on the head can be serious. You can't see a concussion and most sports concussions occur without loss of consciousness. Signs and symptoms of concussion may show up right after the injury or can take hours or days to fully appear. If your child/player reports any symptoms of concussion, or if you notice the symptoms or signs of concussion yourself, seek medical attention right away.

### **Symptoms may include one or more of the following:**

1. Headache.
2. Nausea/vomiting.
3. Balance problems or dizziness.
4. Double vision or changes in vision.
5. Sensitivity to light or sound/noise.
6. Feeling of sluggishness or foginess.
7. Difficulty with concentration, short-term memory, and/or confusion.
8. Irritability or agitation.
9. Depression or anxiety.
10. Sleep disturbance.

### **Signs observed by teammates, parents and coaches include:**

1. Appears dazed, stunned, or disoriented.
2. Forgets plays or demonstrates short-term memory difficulties (e.g. is unsure of the game, score, or opponent)
3. Exhibits difficulties with balance or coordination.
4. Answers questions slowly or inaccurately.
5. Loses consciousness.
6. Demonstrates behavior or personality changes.
7. Is unable to recall events prior to or after the hit.

**What can happen if my child/player keeps on playing with a concussion or returns too soon?**

Athletes with the signs and symptoms of concussion should be removed from play immediately. Continuing to play with the signs and symptoms of a concussion leaves the young athlete especially vulnerable to greater injury. There is an increased risk of significant damage from a concussion for a period of time after that concussion occurs, particularly if the athlete suffers another concussion before completely recovering from the first one. This can lead to prolonged recovery, or even to severe brain swelling (second impact syndrome) with devastating and even fatal consequences. It is well known that adolescent or teenage athletes will often under report symptoms of injuries. And concussions are no different. As a result, education of administrators, coaches, parents and students is the key for student-athlete's safety.

**If you think your child/player has suffered a concussion**

Any athlete even suspected of suffering a concussion should be removed from the game or practice immediately. No athlete may return to activity after an apparent head injury or concussion, regardless of how mild it seems or how quickly symptoms clear. Close observation of the athlete should continue for several hours.

An athlete who is suspected of sustaining a concussion or head injury in a practice or game shall be removed from competition at that time and may not return to play until the athlete is evaluated by a medical doctor or doctor of Osteopathy, trained in the evaluation and management of concussion and received written clearance to return to play from that health care provider.

You should also inform you child's Coach, Athletic Trainer (ATC), and/or Athletic Director, if you think that your child/player may have a concussion. And when it doubt, the athlete sits out.

For current and up-to-date information on concussions you can go to:

## NJSIAA STEROID TESTING POLICY

### CONSENT TO RANDOM TESTING

In Executive Order 72, issued December 20, 2005, Governor Richard Codey directed the New Jersey Department of Education to work in conjunction with the New Jersey State Interscholastic Athletic Association (NJSIAA) to develop and implement a program of random testing for steroids, of teams and individuals qualifying for championship games.

Beginning in the Fall, 2006 sports season, any student-athlete who possesses, distributes, ingests or otherwise uses any of the banned substances on the attached page, without written prescription by a fully-licensed physician, as recognized by the American Medical Association, to treat a medical condition, violates the NJSIAA's sportsmanship rule, and is subject to NJSIAA penalties, including ineligibility from competition.

Athletes may submit supplements and medications to Drug Free Sport AXIS to receive information regarding banned substances or safety issues. Athletes or parents may login to the NJSIAA account at [www.dfsaxis.com](http://www.dfsaxis.com) using the password "njsports".

The NJSIAA will test certain randomly selected individuals and teams that qualify for a state championship tournament or state championship competition for banned substances. The results of all tests shall be considered confidential and shall only be disclosed to the student, his or her parents and his or her school. No student may participate in NJSIAA competition unless the student and the student's parent/guardian consent to random testing.

By signing below, we consent to random testing in accordance with the NJSIAA steroid testing policy. We understand that, if the student or the student's team qualifies for a state championship tournament or state championship competition, the student may be subject to testing for banned substances.

## Memorandum

**To:** All Athletic Directors of Member Schools

**From:** Tony Maselli, Assistant Director

**Date:** June 2019

**Re:** Opioid Education Video Procedure

To All Athletic Directors:

Acting to address the increased risk of opioid abuse among high school athletes, the Office of the New Jersey Coordinator for Addiction Responses and Enforcement Strategies (NJCARES) and the New Jersey State Interscholastic Athletic Association (NJSIAA) announced on February 19, 2019, a new partnership to educate student athletes and their parents/guardians on addiction risks associated with sports injuries and opioid use.

This educational initiative, spearheaded by Attorney General Gurbir Grewal and approved by the Executive Committee of the NJSIAA, is a collaborative effort to use video programming to raise awareness among high school athletes that they face a higher risk of becoming addicted to prescription pain medication than their fellow students who do not play sports.

Beginning with the 2019 fall season, we are making available to all student athletes and their parents/guardians, an educational video about the risks of opioid use as it relates to student athletes. The video will be available on August 1, 2019 and can be found on the NJSIAA website under "Athlete Wellness" which is located under the "Health & Safety" tab. We are strongly encouraging student athletes and parents/guardians to watch the video as soon as it becomes available. An acknowledgement that students and their parents/guardians have watched the video will be required starting with the 2019-2020 winter season.

All member schools are asked to add to their current athletic consent forms the sign-off listed below. The sign-off acknowledgment is an NJSIAA mandate; student athletes are required to view the video only once per school year prior to the first official practice of the season in their respective sport, but the signed acknowledgment is required for each sport a student participates in. Athletes that are 18 years or older do not need the parents/guardians to watch the video.

**Opioid Video is located at:** <https://youtu.be/3Rz6rkwpAx8>

## NJSIAA OPIOID POLICY ACKNOWLEDGEMENT

We have viewed the NJ CARES educational video on the risks of opioid use for high school athletes. We understand the NJSIAA policy that requires students, and their parents(s)/guardian(s) if a student is under the age of 18, to view this video and sign this acknowledgement.
